

SCOTTSDALE PERFORMING ARTS CENTER

CONTRACTOR:

Progressive Roofing (Phoenix, AZ)

ARCHITECT:

Bill Close, AIA

Architectural Resource Team (Phoenix, AZ)

CONSULTANT:

Jerry Brown, RRO

Western Roof Evaluation Corporation (Peoria, AZ)

LOCATION: Scottsdale, AZ

ROOF SIZE: 56,000 sq. ft.

SUBSTRATE(S):

Granular surface cap sheet (25 years old)

PRODUCTS USED:**SURFACE COAT:**

Xtreme Finalcoat

BASE COAT:

Primebase Primer with
Polyester Fabric

DATE OF WORK:

December 2011 - April 2012

**BENEFITS:**

- No tear-off. According to the EPA, roof tear-offs are the 3rd greatest contributor to US landfills. The coatings system products went over the existing 25-year old roof.
- Reduction in heat gain into the building. Lowers the amperage load on HVAC units/Energy Savings
- A sustainable roof. With strong protection from UV degradation.
- The show goes on: All fluid components were low odor, odor free. Because the facility is both a facility and a museum, it could not be shut down for any reason. The coatings system accomplished such without odor concern while also keeping debris and noise to a minimum.
