

Prime Poly Mesh

Stitchbonded Polyester Mesh

Description

Prime Poly Mesh stitchbonded polyester is one of the strongest materials available to the roofing industry for use as a reinforcement in cold process roofing.

Stitchbonding offers an unusual combination of high strength properties with good elongation for excellent thermal stress force accommodations.

Uses

PRIME POLY MESH is a soft polyester that will readily conform to embedded gravel and standing seam metal roof decks. Recommended roof types include new plywood roofs, some granulated roofs, decks or any roofs requiring extensive repairs.

PRIME POLY MESH is also used as a stabilizer for areas that experience ponding water. It is much easier to handle and apply properly than other soft polyester sheets.

Packaging

- 4" × 324' Roll
- 6" × 324' Roll
- 12" × 324' Roll
- 20" × 324' Roll
- 40" × 324' Roll
- 60" × 324' Roll
